

Prateek Rajbhar

MERN Stack Developer

+91 9598976334 prateekrajbhar3311@gmail.com LinkedIn GitHub

Professional Summary

MERN Stack Developer with hands-on experience in React.js, Node.js, Express.js, MongoDB, Redux, and MUI. Skilled in building scalable full stack applications, secure REST APIs, and authentication/authorization with JWT. Strong foundation in JavaScript, HTML, CSS ,Tailwind, and Git with practical delivery of HR Management Portal and TOPL.

Skills

Frontend	React.js, Redux, TypeScripts, MUI, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3
Backend	Node.js, Express.js, REST APIs, JWT Authentication
Database	MongoDB, Mongoose, Cloudinary
Tools	Git, GitHub, VS Code, Postman

Experience

MERN Stack Developer — K Digital Curry (Nov 2024 – Present)

- Developed and optimized REST APIs using Node.js and Express; integrated MongoDB with Mongoose for data modeling.
- Implemented authentication, authorization, and role based access control with JWT and middleware.
- Built MERN features end to end; collaborated with version control (Git) .
- Debugged issues, improved performance, and wrote reusable UI with React + MUI.

Projects

HR Management Portal (Tech: React, Node.js, Express, MongoDB, MUI, Formik, Yup, html2pdf.js, Nodemailer)

- Built multi-step employee onboarding forms with validation and tab-based navigation using Formik + MUI.
- Integrated salary slip generation with auto-filled employee data, dynamic earnings/deductions calculation, and PDF export using html2pdf.js.
- Added functionality to email payslips automatically via Nodemailer + Gmail SMTP.
- Developed a modular and scalable backend (Node.js/Express) with REST APIs and MongoDB for persistent data storage.
- Enhanced user experience with reusable React components, real-time form validation, and clean UI/UX using Tailwind CSS + MUI.

TOPL (Tech: React, Node.js, Express, MongoDB, MUI, Formik, Yup)

- Developed a role-based access control system with multiple user roles including Super Admin, Admin, User, and Client.
- Implemented dynamic permissions allowing roles to have view-only, limited edit, or full access, with Super Admin having full control (add, edit, delete, view).
- Created functionality to manage users based on their role, ensuring secure and role-specific data access.
- Designed and implemented modular backend APIs with Node.js/Express and MongoDB to handle role management and data access.
- Enhanced frontend with React components for dynamic user interfaces and role-based content rendering.

Quiz App (Tech: React, MUI, LocalStorage)

- provide an interactive and engaging quiz experience, allowing users to participate in quizzes, answer questions on various topics, and receive feedback on their performance.

Here's how it works:

1. Multiple-choice or open-ended questions
2. Timer for each question
3. Score tracking and leaderboard
4. Edits and delete quiz and also added questions.
5. Filter apply for Category selection and hardness level selection (e.g., hard, medium and simple)
6. Sign-in, Login and Logout Functionality is also added.

Expense Tracker (Tech: javascript, html, css , & LocalStorage)

- Built a personal finance management app with authentication and expense categorization.
- Implemented CRUD operations for income/expenses with real-time updates.
- Created a responsive UI with simple JavaScripts + HTML + CSS for seamless user experience.

Education

- B.Tech(CSE), AKTU — 74% (2023)
- HSC, K.V.I.C — 65% (2019)
- SSC, R.B.A.I.C — 70% (2017)
